

## FLAWSOLV™ - Installation procedure

### Installation Requirements

The minimum specification for FLOWSOLV™ is as follows:-

- PC with a minimum Intel Pentium 2, 233Mhz processor
- Minimum of 32MB of RAM
- 80MB of Free Hard Disk Space
- Minimum display resolution 800 X 600, 1024 X 768 recommended
- CD-ROM Drive
- Microsoft Windows 95, 98SE, NT4 ,2000, XP, Vista\* with Internet Explorer 4 or above

\*Microsoft Windows Vista requires additional installation steps as listed below

### Installing FLOWSOLV™

1. Insert the FLOWSOLV™ CD provided, the program should auto-run
2. If the program does not auto-run or has been downloaded then open the Start menu and choose the 'Run' option
3. The Run dialog box appears
4. In the Open text box type D:\flowsolv.exe or the location where FLOWSOLV™ installation files have been saved. If you are installing from a different drive replace d:\ in the above command with the appropriate letter
5. Follow the instructions on screen

### \*Additional steps required for Windows Vista only

1. Click on the Windows 'Start' button then choose 'Control Panel'
2. In the 'Control Panel' select the 'Programs' option then under the 'Programs and Features' section choose the option 'Use an older program with this version of Windows'
3. The Program Compatibility Wizard will now start
4. Choose 'Next' then ensure the option 'I want to choose from a list of programs' and click 'Next'.
5. Locate FLOWSOLV™ in the list and select followed by 'Next'
6. Now select the option for 'Microsoft Windows XP (Service Pack 2)' and click 'Next'
7. Ensure that none of the options are checked and select 'Next' again
8. Select the check box 'Run this program as an administrator' and select 'Next' twice
9. Now select the option 'Yes, set this program to always use these compatibility settings' and click 'Next'.
10. Finally select the check box 'No' and click 'Next' and 'Finish'

### Starting FLOWSOLV™

Starting FLOWSOLV™

1. Locate the FLOWSOLV™ icon on the desktop
2. Double Click the icon to start the programme

If you cannot locate the icon on the desktop

1. Click the Windows 'Start' button
2. Hold the mouse over 'Programs' on the menu
3. Locate the FLOWSOLV™ icon and click to start
